

To Whom It May Concern;

RE: Commercial and Industrial Recycling

Since 2015, the Redwood-Renville Regional Solid Waste Authority (RRRSWA) has had a long-standing relationship with West Central Sanitation to provide recycling collection services for businesses and residents in Redwood and Renville Counties. These recycling collection services include: the distribution of 95-gallon recycling carts for residential and businesses, the distribution of 8-yard rural recycling site containers, the organized collection of the old 95-gallon recycling carts and 8-yard rural recycling containers, and the updated routing of city collection and rural recycling containers.

In 2023, RRRSWA went through a solicitation process to select a recycling company for Redwood and Renville Counties. Through careful vetting and many considerations, West Central Sanitation was selected by RRRSWA. West Central Sanitation has met all the county requirements, including bonding and licensing, and was awarded the contract by RRRSWA. Under that contract, West Central Sanitation is the recycling collector/hauler for any commercial and industrial customers that request recycling services within the two counties.

Thank You

Jon Mitchell

Executive Director,

Redwood-Renville Regional Solid Waste Authority (RRRSWA)
